

## **Supplemental Statement of GuRu Wireless, Inc.**

### **File Number 0014-EX-ST-2020**

This STA is needed for demonstration of 24 GHz wireless power transfer at CES2020. It is a 3 day request and all transmissions will be indoors and downward pointing.

The equipment has multiple safety features to decrease power if a human or pet approaches the high power flux density area. In addition highly skilled personnel will monitor the equipment when it is in use to prevent excess RF exposure.

This equipment meets all Part 18 requirements including frequency . It, however, does not have equipment authorization at this time.

#### **Antennas**

All tests will involve antennas with 37 dBi gain and beamwidths less than 10 degrees
