- Harris" Microwave COmmunications Division is currently developing next generation radio, Galileo. Experimental license KO2XGT will be used for field trial and testing during the Galileo radio development process.
- Harris will conduct field trial in selected locations nationwide for microwave radio propagation characteristics study using MegaStar radio (HRS-MG06G3S1-1), Constellation (HRS-CX-06G155M) and Galaxy (HRS-GY-23G03S1). These radios are FCC approved equipment. Total number of units used in the field will be far below 50.
