

Question 7: EXPERIMENTATION DESCRIPTION (modified)

The purpose of the experimentation to be conducted pursuant to the requested authorization is to facilitate the software development and verification of Land Mobile Radio (LMR) equipment that will operate in the 700 MHz Public Safety narrowband spectrum. Software development and verification in bands other than the 700 MHz Public Safety narrowband spectrum will not provide public safety licensees with reasonable assurances of equipment reliability for operational use in the 700 MHz Public Safety narrowband spectrum.
