Subject: Request for Info - File #0016-EX-CN-2016

---

Message:

Item 1) Earth station noise temperatures for DWNLINK beam group id#8 and group id #9 were incorrect. The updated API file with the correct noise temperature of 410 degrees has been uploaded to the OET ELS database.

Item 2) Applicant requests that IB/SD allow submitting the filing with the Globalstar link as EH (as is).

Item 3) Dish and Echostar have provided a coordination letter to Harris with terms and conditions related to the usage of shared spectrum. This coordination letter was provided to the FCC via email.

Thank you  
Steve Gillespie
