Subject: Request for Info - File #0140-EX-PL-2014

---

Message:

Re: Experimental license request - File No. 0140-EX-PL-2014, Harris Corporation

Doug,

This reply serves as an update in Harris' coordination with the FAA regional coordination Team to obtain the required NGT number relating to Experimental Application File No. 0140-EX-PL-2014.

The FAA coordination team has reviewed the FAA Form 6050 - Frequency Engineering Request Form previously submitted by Harris and had follow up questions regarding the channel bandwidth and maximum transmit power needs.

Harris has provided the FAA coordination team with the additional information and is awaiting a response, which hopefully will be forthcoming.

The coordination process is nearing finality. Harris remains actively committed to successfully coordinating this with the FAA Eastern Regional Frequency Management Office to obtain an NGT number and reiterates its appreciation of the Commission's patience in the prolonged coordination process.
