Subject: Request for Info - File #0236-EX-CN-2017

---

Message:

1.) I corrected the "radius of operation" as it was a typo and should be 20.00 km as are the other 3 related applications (EL193570, EL143293, & EL552645).

2.) I apologize for any confusion but this is a ground fixed location for preliminary stand-alone testing of the radar unit that will eventually be located in the nose of the Grumman MQ-4C UAV aircraft. At that time, Grumman will do their own airborne complete system testing.

Hope this brings some clarity to the application. if not, please let me know.
