Subject: Request for Info - File #0139-EX-ML-2015

Message:

Dear,

We are planning to integrate in our experimental testbed another technology LTE small cell base station from Qualcomm. This base station is capable of operating only on bands:

B2 : 1850 - 1910 & 1930 - 1990 MHz

B4 : 1710 - 1755 & 2110 - 2155 MHz

To this end, we would like to get permission to perform our experiments on these bands.
Please feel free to contact us for further information.

Thank you.
