Subject: Request for Info - STA File #0056-EX-ST-2010

Message:

Mr. Young,

In reference to correspondence number: 10282

We understand from your previous correspondence that some frequency bands may be denied; however, we are running out of DDL radio channel/bands to select from. We have requested operation in 6 different bands, but we will be happy with even one. If we need to coordinate operation with other users in the higher end of the bands, we will initiate efforts to do that.

We are requesting 6 channels which are ~ 5 MHz wide. We have looked at the channel definition from our vendor (AeroVironment Inc) and are requesting operation in following frequency bands:

Channel 1	1691.5-1696.5 MHz
Channel 2	1696.5-1701.5 MHz
Channel 3	1701.5-1706.5 MHz
Channel 4	1706.5-1711.5 MHz
Channel 5	1711.5-1716.5 MHz
Channel 6	1716.5-1721.5 MHz

This keeps us out of the unallowed bands of:

1660.5 -- 1668.4 MHz
1625.5 -- 1654.5 MHz
1673.5 -- 1690.5 MHz

Thank you
Ragon Michael
