---

Message:

Doug,

Here are the answers to your questions.

1) The contract information for our government sponsors are:

25th ID  
Richard Szczepanski  
gMAV APM / Special Projects Lead  
PM Tactical Concepts  
SFAE-AV-UAS-TC  
Desk: (256) 876-1996 (DSN 746)  
Blackberry: (256) 417-5552  
Fax: (256) 842-2476  
NIPRNET: richard.szczepanski@us.army.mil  
SIPRNET: richard.szczepanski@redstone.army.smil.mil

EOD  
Brian Anderson  
Administrator/Technician Specialist  
EOD Systems  
PMS-408 (EOD-13)

NAVEODTECHDIV  
2008 Stump Neck Road  
Indian Head, MD 20640  
Ph: 301-744-6906  
Fax: 301-744-6973

DARPA  
Bruce Lowman  
703-522-5123 (O)  
703-309-1004 (M)

2) The frequency range requested are for the frequencies that the radio is capable of operating. They were requested so we could verify operation over the entire range of the radio. The MAV systems will be operated outside the continental US and may need to be operated on the non-government frequency bands. At this time there are no plans to restrict which frequencies the radio can be operated on.

3) The MAV is typically flow between 20 and 250 ft AGL. The MAX altitude is 400 ft AGL.

Thanks,  
Scott Hodgson

Staff System Engineer  
UAS Project - Micro Air Vehicle Program
