Subject: Request for Info - File #0379-EX-PL-2008

Message:

Mr Young,

Here are the answers to your questions.

1) Yes, these same frequencies are acceptable for this application.

2) No, at this location the UAV is tethered, so the maximum altitude is constrained to 180 ft AGL. The elevation of our tether facility is 5100 ft MSL.

Thanks,
Scott Hodgson
