Subject: Request for Info - File #0379-EX-PL-2008

---

Message:

Mr. Young,

The following is a clarification of our coordination with the FAA regional office. There was in fact a misunderstanding of what frequency coordination was required. The following is from an email correspondence with Ms. Kimberly Mai (CSA Spectrum Engineer):

Mr. Ragon,

Below are NG T Numbers:

for Albuquerque, NM

NG T080503, M1370.000 - M1390.000

NG T080504, M328.600 - M335.400 (Excluding 331.1, 332.9 and 334.4 MHZ. We are using these three frequencies around that area.)

for Laguna, NM

NG T080512, M1370.000 - M1390.000

NG T080513, M328.600 - M335.400 (Excluding 331.1, 332.9 and 334.4 MHZ. We are using these three frequencies around that area.)

Best regards,

Kimberly Mai

AJW-C15F, CSA Spectrum Engineer

Office: (817)222-4765

Fax: (817)222-5977

Email: Kimberly.Mai@faa.gov

For this filing (0379-EX-PL-2008), the applicable NGT number is NGT080503 for 1370-1390 MHz for Albuquerque. Other NGT numbers in her email are associated with other applications (I'll post them in the appropriate correspondence file).

I believe this completes our coordination for this filing. Please don't hesitate to advise either Scott Hodgson or me if there is additional information you need relative to this application.

Thank you

Ragon Michael
