Subject: Request for Info - File #0412-EX-PL-2008

Message:

Mr. Young,

Honeywell has reconsidered the use of frequency band 2320-2345 MHz for our UAS operation. We will exclude this band from our operation. Please exclude this frequency band from our request.

We have initiated coordination efforts with the POCs you provided for frequency bands 2310-2320 MHz and 2345-2390 MHz. I will post the guidance from these POCs once our coordination plans are in place.

Thank you
Ragon Michael
