Subject: Request for Info - File #0412-EX-PL-2008

Message:

Mr. Young,

Please coordinate the entire 310-390 MHz band. We understand that the Military Assignment Group (MAG) controls this band, but all of our customers (to date) are military customers. We attempt to utilize the radio frequencies that they request for their particular application. As a result the 902-928 MHz band is not always an option for us.

If there are portions of this band that the MAG regards as strictly ?off-limits?, then we will have to work around those. However, our use of this band is at the request of our military customers. The POCs identified in our attachment to question 4 on the application may be of help as they can speak to the needs for their particular application.

Thank you for your effort in this matter,
Ragon Michael
