

MBR 179

KONGSBERG

MARITIME BROADBAND RADIO

The Maritime Broadband Radio is a smart antenna designed for use in any application where digital high-speed reliable communication and data transfer is crucial for efficient and safe operation. With the possibility to adjust the antenna direction in azimuth, the MBR 179 provides high gain omnidirectional coverage ideal for vessels and other moving platforms. With narrow fan shaped antenna diagram, a strong link margin is maintained and continuously updated as the unit is unaffected of vessel movements.
