Subject: Correspondence Reference Number: 10985

Mr. Ghaffari,

This email is regarding application for STA, file number: 0268-EX-ST-2010. I received the DoD form 1494 for the piece of equipment listed in the application and realized that there are 2 antenna's (instead of one as described in the application) one ground based broadcasting at 333.5-370.5 MHz and one airborne broadcasting at 198-262 MHz. The airborne antenna will be at 3,000ft. AGL to 4,500ft. AGL while the ground based antenna will be installed 5ft AGL. I will be the 24-7 contact for this authorization. (contact info. Below)

I failed to copy the confirmation number for the application correctly and cannot log into the form 159 to make payment. With the changes above to the license and no confirmation number should I just resubmit a new application with the updated info.?

Thanks for your help.
