Subject: FCC File No. 0500-EX-ST-2012

Message:

The stop buzzer information provided is the best number currently available. Individual with cell phone is currently in and out of the hospital with wife after delivering new baby and could not use the cell phone in the hospital. No voice mail was left so individual did not know who to call back.

If the requirement is to have a 24x7 manned phone number at all times even when not operating RF devices then additional time is needed to establish this requirement. It does not exist for this company today.

Please advise.

Thanks
