

19-November-15

Introduction

Intel is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices. Intel also offers a portfolio of wireless communications solutions to connect a broad range of devices. Hardware and software products by Intel and its subsidiaries power the majority of the world's data centers, connect hundreds of millions of cellular handsets and help secure and protect computers, mobile devices and corporate and government IT systems. Intel technologies are also inside intelligent systems, such as in automobiles, automated factories and medical devices.

Testing to be Performed

Intel's research and development teams have been designing new radio technologies for the next generation broad band wireless devices. Over the air testing that is required to validate the designs, characterize propagation impact, and verify overall performances will start with in building tests during the first phase before being moved to an outdoor environment.

Request for Modification:

File Number: 0459-EX-PL-2015

Call Sign: WH2XXL

Location: Same

Intel Jones Farm Campus
2111 NE 25th Avenue, JF2-15
Hillsboro, OR 97124

Centered at SW corner of building JF3: 45-32'34.86" N, 122-57'41.12" W

Phase 1 – Indoors only

Phase 2 – Outdoor, covering courtyard area between buildings.

Changed: Transmitter & Antenna Parameters
