Message:

1. Intel will consult with an industry SAS provider, per part 96.55(a)(3), providing the geographical coordinates prior to operating within this band.
2. Intel will consult with the ULS database for incumbents in the intended band of operation and notify the registered users within the proposed geographical areas prior to operation. The proposed testing will be supervised by engineers who will have constant access to promptly address any interference issue including cessation of all transmissions.
3. Intel shall prior coordinate with any licensees in the 3700-4200 MHz in the vicinity to avoid harmful interference to users in the band.
