

26 November 2018

Introduction

Intel is a world leader in computing innovation. The company designs and builds the essential technologies that serve as the foundation for the world's computing devices. Intel also offers a portfolio of wireless communications solutions to connect a broad range of devices. Hardware and software products by Intel and its subsidiaries power the majority of the world's data centers, connect hundreds of millions of cellular handsets and help secure and protect computers, mobile devices and corporate and government IT systems. Intel technologies are also inside intelligent systems, such as automobiles, automated factories and medical devices.

Testing to be Performed

Intel's research and development teams have been designing new radio technologies for the next generation broad band wireless devices. An Experimental License is requested for testing and demonstrations. Authorization from the carrier to utilize their spectrum for these tests has been granted, and such testing will not connect to their network.

Location:

San Diego, California

32° 56' 23.00"N

117° 6' 9.00"W

100 meter radius

Proposed Operation: 12/6/2018 – 12/6/2020

"Stop Buzzer" Contact

stopbuzzer@intel.com
