

Memorandum to F.C.C.

08/01/2008

From: James E. Whedbee (dba J.A. Rogers Radio Club)

Re: Application #0410-EX-ST-2008

Subject: Application Purpose

Dear Sir/Ma'am:

This application has been submitted to modify the existing STA for Experimental Radio Station, WD9XIT, licensed to the undersigned. The following modifications are being proposed: Name includes name of radio club with which the station shall be affiliated within the Kansas City MO School District; station location has been changed to correspond with the school location (now that I know where I'll be located this year); radius of operation has been decreased to reflect only the distance between the school campus and the licensee's home address - this allows for further restructuring within the Kansas City MO School District as may be mandated due to the No Child Left Behind Act; transmitter changed from Icom 735 to Yeasu FT-101EX - this change is considered a swap of nearly identical equipment; addition of F9W emissions with a 6,200 Hz bandwidth - this addition is considered desirable, however, if approval of this addition would frustrate an expeditious grant of the application, please disregard it. Unfortunately, with the district in turmoil due to federal education laws, these changes were necessary and weren't intended to add to the F.C.C.'s already considerable burdens. If the radius of operations above is preserved, it is unlikely future location changes will be necessary. In advance, thank you!

Best wishes,

/s./ JAMES EDWIN WHEDBEE, M.Ed. (8/1/08) for:

WD9XIT
