Message:

Hi,

I am new to filing for this type of license. My extension request 0889-EX-ST-2019 was denied because I filed it as an extension or modification, so I filed a new application thinking that a new application is permissible. My FAA frequency coordination remains in effect for the 6 months of a current application, but expires before 6 months after that, so I would like to have the permission to use the frequency for the last 6 month period before the FAA frequency coordination expires.

Also, I made a mistake on the end date. I would like to change it to a 6 month period, not 6 months from now. Would you also please change the dates to be 07/09/2019 through 01/08/2020?

Thank you, and Best Regards,

James Waineo
