---

Message:

Mr. Ghaffari,

In response to your correspondence dated Nov. 4, 2019, KeyW Corporation ("KeyW") respectfully removes the 8450-9000 MHz (Earth-to-space) band from consideration under this application.

KeyW will limit its earth station operations to the 9200-10550 MHz (Earth-to-space) band.

Moreover, KeyW notifies the Commission that there has been a launch date slip. The launch is now scheduled for approximately June 2020, and KeyW will update the Commission with an exact launch date once confirmed.

Please do not hesitate to reach out with any questions regarding this matter.

Regards,

Carlos Nalda
