First, Would an STA be approved given footnote US 246?

Second, Is there a way to get approval to transmit indoors at 110-220 GHz?

Third, Can I amend the current application to operate in the gaps between 110-200GHz. The new operating frequencies would be: 103-104GHz, 117-163GHz, 169-181GHz, 186-200GHz?

Thanks, Jim
