---

Message:

I received two emails, one email for FAA coordination and one email for MAG pre-coordination.

I have been working with David Judge, Spectrum Engineer Supporting the FAA, ACES Corp via Leidos and NISC III, 301-525-3272 for more than a month on the FAA coordination.

I have placed a document with the US Army POC and contract number as an attachment to the license. I contacted 'Behnam.Ghaffari@fcc.gov' about the MAG coordination and I have an email that indicates all I have to do is post the exhibit with the US Army POC and contract number.

I'm not sure what to do. Was I supposed to email the exhibits? Did the FAA coordination take too long? Please provide a clue as to what I can do to get this license approved.

I have been applying for FCC licenses for this company for 15 years and never had this experience before.

Any help you can provide would be appreciated.
