

Description of Pro Forma License Assignment

L-3 Communications Cyterra Corporation (“Licensee”), which holds the Experimental License WE2XLN (FCC File No. 0614-EX-CR-2019) (“License”), is hereby proposing, through this application and subject to Commission approval, to assign the License to a parent entity, L3 Technologies, Inc. (“L3T”), as part of an internal corporate re-structuring. As L3Harris Technologies, Inc., ultimately controls both the Licensee and L3T, the proposed assignment is pro forma. The proposed assignment also does not involve any other FCC authorizations that require FCC approval prior to consummation. Accordingly, prompt FCC grant of this application is respectfully requested.
