Attn: John Kennedy

Reference: FCC Application 0256-EX-PL-2007

Mr. Kennedy,

Per our conversation the other day concerning this application, I would like to request that the referenced application be expedited for the following justifications:

1. Frequencies required to support antenna testing that is part of a system in development. This system is being developed to detect and neutralize Improvised Explosive Devices (IED).
2. As you are aware, this and related programs by L3 Communications are of critical importance to enhance safety of life in the Global War on Terrorism and our troops operating in Southwest Asia. In order to meet contract timelines, the timely receipt of approval to operate on the requested frequencies is critical to this system development.

Request favorable consideration of this request, and please feel free to contact me if further information or clarification is required.

This expedite is re-filed, original file number 0256-ex-pl-2007 was dismissed without prejudice.

Sincerely,

Gary Amaral
