

L-3 Global Communications Solutions, Inc.

NARRATIVE STATEMENT

Your applicant is a leading supplier of transportable VSAT terminals to the United States Department of Defense. Your applicant is expanding its experimental operations to use the military X-Band recently augmented by the launch of the WGS constellation.

For testing and demonstration purposes, your applicant will use a 3.8M hub antenna at its headquarters in Victor, New York. Your applicant intends to use the XTAR-LANT satellite.

Three terminals developed for multiband use including X-Band are planned for testing from facilities in Chantilly VA, Fayetteville NC, Tampa FL and Hauppauge NY. These terminals include the Panther MicroSAT terminal, Hawkeye III Lite (1.2M) and Hawkeye III (1.6/2.0/2.4M). Each of these terminals has either completed or are in the process of completing ARSTRAT certification for the Department of Defense.

Attached is correspondence in support of this application from a branch of the Department of Defense.
