Subject: 0379-EX-CN-2018 pre-coordination data request

---

Message:

Coordination correspondence with Karis Hastings representing Sirius XM is captured as an attachment.

Sirius XM's concerns have been resolved with the agreement that any mobile use of the 2315-2320 MHz and 2345-2350 MHz frequency segments will not occur while the transmitting device is higher than 30 meters AGL.
