Date: March 10, 2010

Subject: FCC File No. 0101-EX-ST-2010

Message:

The temporary FCC license we are requesting is for support of a DoD sponsored activity. We will be demonstrating a capability that is urgently needed by the military at an exercise scheduled for late April into May of this year at Fort Story. This exercise is called Trident Spector. The integration, testing and calibration of equipment that will be used at this exercise will occur at Grayson County Airport near Sherman, Texas. The temporary FCC license is to support these test activities that will occur in Grayson County, Texas.

Also, per your request, please notch out of the application request the 2400 to 2417MHz band range.

Thanks,
Brian Anderson
Flight Test Director
