Message:

The 37.4 dBW power figure noted in Exhibit 1 was the conditional maximum EIRP as determined through pre-coordination of the STA request. The facility will utilize a maximum ERP of 5400W, as specified on the form, which stays within the conditional limit of 37.4 dBw (or approximately 5,495 watts) as conditioned in the pre-coordination process. Thank you very much for this opportunity to confirm that the appropriate ERP for the proposed STA is 5400W.
