---

Message:

I have made the requested changes to the application.

I also added the frequency Range: 436.00000000 to 509.00000000 kHz, which is between the FAA frequency bands.

I had requested two frequencies from the FAA in the 510-535 Khz band, but they were denied, and not included in the application.

Kind Regards,  
Glen Allen
