Message:

Hello Mr. Ghaffari,

I sent an email with this message as well which had some attachments.

We are currently working the process for my company to pay for the licensing fee with the corporate credit card as we did for our last experimental license.

I am however a little lost on what is needed from us. When you ask for a detailed exhibit that describes our request, does that need to include technical information such as the frequencies and power as previously entered into the form 442, or a "description" of the operation we are attempting to conduct?

I have included a word doc of what I came up with for you to look over. Please let me know if this is acceptable.

I downloaded and filled out the AFTRCC form 87. Is that the appropriate form for this request? On the form it asks for an identification control number, but I am not sure where that is generated. Please advise. I have also attached the rover characteristics which has information on the transmission properties of the rover.

Any help or advice is greatly appreciated as always.

V/r
