

Exhibit 1

This Modification Application is being filed for Station WI2XOR to:

- Increase radius of operation to 7 km around Location 1 (34-43-16 N.Lat.; 86-40-30 W.Long.)
- Delete the antenna for Ft. Stewart, GA.

No other technical changes are being made to the license.

Leidos again confirms that operations authorized under the license continue to consist of both ground-based and airborne transmissions (see graphic below) at each of the remaining cities specified on the license, within the areas of operation specified on the license for each such city.
