Subject: FCC File No. 0255-EX-CM-2020

Message:

Can you elaborate on what you think is missing?

This emission characteristic is consistent with the current license we have.

- 10M0Q9N seems to be a valid designator and is appropriate to what we are doing.

- I found this description:

- Bandwidth: 10.0 MHz

- Modulation Type: [Q] Pulse, carrier also angle-modulated during pulse

- Modulation Nature: [9] Composite, one or more digital channel, one or more analog

- Information Type: [N] None

Regards,
Craig
