

**PURPOSE OF MODIFICATION
(CALL SIGN WG2XAF)**

Lockheed Martin Corporation ("Lockheed Martin") hereby seeks modification of its authorization held under Call Sign WG2XAF in order to add the ROVER V transmitter to its ongoing demonstration and testing operations of the data-link in the Sniper Targeting Pod program.

To support the ROVER V testing, Lockheed Martin seeks to add the following frequencies to each of the mobile areas of operation currently identified on its license:

1782.0 MHz
1800.5 MHz
1825.5 MHz
1849.0 MHz
2201.0 MHz
2225.5 MHz
2250.0 MHz
2275.5 MHz

No substantive changes are contemplated to the parameters already licensed under File No. 0542-EX-RR-2015. Three (3) clerical errors relating to miscoded emission designators have however been corrected.
