

**PURPOSE OF MODIFICATION  
(CALL SIGN WK2XVE)**

Lockheed Martin Corporation is currently operating an experimental system under license WK2XVE in support the Precision Strike Missile for the U.S. Army Precision Fires Rocket and Missile Systems (PFRMS) project (U.S. Government contract W15QKN-14-9-1001).

By the instant modification, Lockheed Martin seeks to make two changes to its application:

- (1) **Add Lockheed Martin's Camden, AR facility**, with identical parameters and use to what is authorized for Grand Prairie, TX.
- (2) **Add 425.0 MHz**, as a very low-power signal to activate a tone generator.
