

DESCRIPTION OF OPERATIONS

Lockheed Martin Corporation ("Lockheed Martin") hereby seeks experimental authority under Part 5 of the Commission's rules to permit it to conduct functional tests of the the General Dynamics URC-200 radio. The URC-200 is a component of the airborne VHF Single Channel Ground and Airborne Radio System (SINCGARS) transceiver, which is integrated into Lockheed Martin's C-130J aircraft prior to delivery to the United States Air Force.

These operations are supported by U.S. Government contract number FA862511-C6597.
