Message:

Responses to your recent inquiry follow:

1)Is the operation on board of manned aircraft or UAS?

This is an F-16 fixed-wing aircraft.

2)Provide the height of UAV/UAS above ground level during operation.

Aircraft operations will not exceed 40,000 ft AGL.

3)Provide radius of operation.

FAA coordinated a notional radius of 350 km (189 nautical miles). However, see 4) below.

4)Provide geographical coordinates of the location that you proposed.

FAA coordinated these operations for the Gulf of Mexico; FAA explicitly did not request coordinates and instead authorized the area as GLM (Gulf of Mexico). We have mirrored the details of the attached NGT frequency assignments within this application, including for the same area of operation.

5)Stop Buzzer info(phone and name).

Kurt Moriak – Desk: 817-763-1323, Cell: 817-676-5880

John Buswell – Desk: 817-655-6419, Cell: 817-889-1647

Andres Estrada – Desk: 817-763-1001, Cell: 817-614-7534
