

Exhibit 3
Additional Contract
Explanation

Add contract number **NSWCCD-08-066** to the list of authorized contract numbers listed in item #3 of the current license. Addition of this contract number will authorize the subject Nulka IR&D effort for free space RF transmission IAW current authorized frequency allocations. The subject IR&D effort is currently being managed through a Cooperative Research and Development Agreement (CRADA) that has been signed by BAE Systems Australia, Lockheed Martin, and the Naval Surface Warfare Combat Center Division (NSWCCD).

Authorization of the frequency allocations 6-18 GHz will allow an alternative test means for Nulka Antenna Isolation testing. Authorization of the frequency allocations 2260 and 2261 MHz will enable the transmission and monitoring of telemetry data from the Nulka Payload during various test events.
