Woodside, NY 11377

March 13, 2008

Paul Scutieri,  
Regional Sales Director - NY State  
One Executive Centre Drive  
Suite 200  
Albany, NY 12203

Dear Mr. Paul Scutieri,

The purpose of this letter is to acknowledge, support and concur with the request, of Tyco Electronics, that the Federal Communications Commission (FCC) consider and grant the application submitted by the M/A-Com Division.

The New York City Police Department (NYPD) is currently evaluating technologies which are more spectrally efficient and meet the requirements of FCC 07-39, the Third Report and Order of WT Docket 99-87 – Promotion of Spectrum Efficient Technologies on Certain Part 90 Frequencies.

To accomplish this evaluation, NYPD would like to reference FCC Callsign WIF560, utilizing Location No. 4 with the transmit frequency 470.8875MHz and receive frequency 473.8875MHz, on which the Pilot Radio System would operate.

If you have any questions, please contact SRRO John Horst at 718.476.7554.

Respectfully,

A handwritten signature in black ink, appearing to read "S. Probeck".

Scott T. Probeck  
Captain
