

Attachment to FCC Form 601 for Developmental License Application

Authorization request is for up to 20 mobile units to be operated in various aircraft for test and demonstration purposes. This system is the Universal Access Transceiver operating at 978 MHz using 1M30F1D emission consistent with all waveform requirements for the UAT system as required in Part 87. All units operate at 10W and use an omni directional (0 dBi antenna). These mobile UAT units meet all waveform, media access and payload content requirements consistent with airborne use.

The FAA Spectrum Office is aware of this request. FAA contact is Victor Hinton 202 267 7532
