

MRTC Motorsport Communications
MRTC, Ltd.
Application for Special Temporary Authority
File No. 0289-EX-ST-2018

PURPOSE OF STA AND FREQUENCY COORDINATION

The purpose of this STA is to further test an automobile racing communications system for simplex and duplex voice that is in the developmental stage. The tests will occur at a single, three-day test session in Florida at the Sebring Raceway. The system will be deployed at Sebring by the two different Race Teams: AF Corse and Mazda Joest. The race teams will use the communications system on a developmental testing basis on behalf of and overseen by MRTC Motorsport Communications.

The dates during 2018 when this system will be deployed are March 15-17 inclusive.

The applicant requires 27 VHF frequencies as specified in this application for duplex and simplex voice transmissions, and 4 simplex channels at UHF for voice transmission to and from the race vehicles and among the crews.

The applicant has consulted the ULS database with respect to the VHF and UHF channels sought, and proposes what are believed to be unoccupied channels in the area of the Sebring International Motor Speedway.

The “stop buzzer” contact on site on behalf of the applicant is Mr. Daniel Cox, whose mobile number is +44 (0)1509 224 300.

Other inquiries and backup “stop buzzer” notifications can be addressed to undersigned counsel for MRTC Motorsport Communications:
