**Re: MTN License Corp.  
Withdrawal of Request for Special Temporary Authority  
FCC File No. 0033-EX-ST-2010, Confirmation No. EL507502**

Dear Ms. Hey:

MTN License Corp. ("MTN"), by its attorneys, hereby withdraws its above-referenced request for an experimental Special Temporary Authority to operate a 5.0m earth station antenna in Holmdel, New Jersey to be used as part of a U.S. Air Force program to provide emergency communications and damage assessment in Haiti in connection with last week's devastating earth quake. MTN is withdrawing its request because it has been informed that the United States Air Force has been able to make suitable alternative arrangements to achieve the communications capability that MTN was preparing to provide, and thus that MTN's request is no longer necessary.

MTN appreciates the impressive responsiveness of the Federal Communications staff in the processing of this request, particularly the efforts of Messrs. Settle and Greenwalt (OET's contact persons for Haiti earth quake relief and assistance efforts), and regrets any inconvenience that resulted from the uncertainty of the rapidly-changing requirements of those rushing to provide that relief. These unfortunate emergencies can arise at any time and at any place, so it is instructive to know that the Commission as well as MTN is prepared to work to provide help when and where it is needed.

Please let me know if you have any questions concerning this matter.

Respectfully submitted,

Stephen D. Baruch  
Attorney for MTN License Corp.
