---

Message:

2161 was a previous filing that contains an obsolete antenna, 2280 contains the correct information. The discrepancy is in Manufacturer section, 2161 contains one OpenLST radio and one Near Space Launch GlobalStar radio. The GlobalStar radio is not going to be used, instead we are using two OpenLST radios as specified in 2280. Since we could not change the manufacturer when amending 2161, we needed to file a new application, 2280.
