Re: Application Amendment; File No. 1134-EX-ST-2020

Microsoft Infrastructure Group, LLC (“Microsoft”) hereby amends its pending application, file number 1134-EX-ST-2020, for experimental Special Temporary Authority (“STA”) by removing the S-band downlink frequencies 2200-2290 MHz. Microsoft now seeks to use only the 8025-8400 MHz frequencies in the X-band for downlink operations and the 2025-2110 MHz frequencies in the S-band for uplink operations, as specified in the application.
