Subject: RE: FCC File # 0346-EX-ST-2007 [Reference Number: 5134]

Dear Mr. Trevino,

Since you last e-mail we are in discussion with our client , who is wondering why one needs the consent of the network operator when asking for STA. We told them, that the GSM networks are a kind of private and before FCC can allow the use of a private network, the owner of that network must give his consent, but they insist on an official answer from FCC.

Would you mind sending us the reason for asking for the network operator consent, so our customer has this explanation from the official side?

Thanks in advance

Best regards / Mit freundlichen Grüßen
Karin Silberhorn

Mr. Arnaldo Ferrer,

Please generate a new confidential exhibit containing the consent from the affected PCS licensee to use the 1850-1910 MHz band for each of the locations at which you are requesting to operate and also submit a new Request for Confidentiality.

The Request for Confidentiality shall be the responses to 47 CFR, Part 0.459(b), 1 thru 9. Your responses to 47 CFR, Part 0.459(b) 1 thru 9 must be non-confidential because they will be made viewable to the public. In your response to 47 CFR, Part 0.459(b) 1, list only the titles of the exhibits that you wish to be held confidential. You should be aware that all other parts of the application will not be held confidential which means that the locations, frequency band, power, bandwidth, emission, etc., will be made viewable to the public. Only exhibits will be held confidential.
