Message:

Dear Mr. Bruce Jacobs:

Please provide the following supplemental information to assist us in processing your experimental license request:

1. measured out-of-channel and out-of-band emissions data on its base station and customer premises equipment transmitters, including the frequencies of the second and third harmonics of the carrier frequency.
2. indicate the latitude/longitude/elevation coordinates of its base station transmitting antenna and the azimuth of the peak of the main lobe of the base station antenna.
3. clarify its base station transmitting antenna pattern with regard to beamwidth in the vertical and horizontal planes.
4. provide the maximum EIRP of its customer premises equipment transmitters.
5. provide the geographic boundaries inside which it will operate its customer premises equipment transmitters in terms of latitude/longitude coordinates.
6. provide an analysis showing that the reverse-band operation is no more interfering than forward-band operation.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of May 05, 2006 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
