3 December 2012

Larry Springer K6PJ

Dear Larry

Thank you for your email. I have revised the frequency coordination as per the later document which somehow I missed. The new details are:

Uplink 145.860 MHz

Downlink 437,405 and 437.230 MHz

I trust that the above meet with your requirements

Please advise update us on the launch date and also what other satellites using amateur frequencies are on the same launch

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

You are also referred to the ITU requirements for satellites. We have prepared an easy reference document which is available on www.iaru.org/satellite, it will assist you to comply with the ITU requirements for Amateur satellites.

Please also read the attached "controlling satellites" document.

Best wishes for a successful project.

Please keep us informed of developments and progress.
