

Motorola Solutions, Inc.
Request for Renewal of Experimental License
ELS File No. 0231-EX-RR-2012

NARRATIVE STATEMENT

Pursuant to Sections 5.51 and 5.53 of the Commission's rules, 47 C.F.R. §§ 5.51, 5.53 (2010), Motorola Solutions, Inc. ("MSI") hereby respectfully requests a renewal of its experimental license for a one year period commencing September 1, 2012, so that it may continue to conduct tests in the 758-768/788-798 MHz band in connection with the development of Long Term Evolution ("LTE") equipment as authorized under File No. 0337-EX-PL-2011 and call sign WF2XWB.

MSI notes that it has asked for the renewal authority requested herein to commence as of the date its current license is scheduled to expire. Coincidentally, FirstNet is scheduled to begin operation in a similar same timeframe. MSI recognizes that its operations may be subject to additional coordination requirements once FirstNet becomes fully functional and the FCC and FirstNet decide how to coordinate the operations in this band.

In the meantime, however, MSI requires a renewal of its authority so that it may continue to test, evaluate and demonstrate prototype equipment that will accommodate the communications needs of users. Accordingly, as provided under Section 5.61(b) of the Commission's rules, 47 C.F.R. § 1.62 (2010), this application is therefore also intended to serve as a continuance of MSI's authority to operate as permitted under its license pending action on the instant application.
