

June 5, 2014

Federal Communications Commission
Office of Engineering and Technology
Equipment Authorization Division
7345 Oakland Mills Road
Columbia MD 21046

Subject: Narrative statement – Experimental License

To the Commission:

Motorola is developing fixed antennas for RFID systems that will work for both US frequencies and EU frequencies.

Motorola Solutions has a development facility in Bentonville AR that recreates specifically the indoor retail / commercial environment that the antennas will be utilized when in operation.

The development will reduce development and production costs as the hardware will be identical for both US and EU deployments despite the difference in operational frequencies used.

Respectfully,

A handwritten signature in cursive script that reads "Mark S. Luksich".
